Trainer Notes

.Net
Week 3 - Day 13
(WNWD13)

Table of contents

Session Details

Duration: 6 hours

Time Division:

	Tasks	Duration
1	Recap of the previous lessons & Objective of the day	10 min
	● Brainstorming	10 min
3	● ASP.NET Web Applications	2 hrs
4	● Web Forms	2 hrs
5	● Compare Validator	1.5 hrs
6	● Homework	10 min

Learning Objectives

By the end of this session, the students will have developed an understanding of:

- ASP.NET Web Applications
- ASP.NET Web Project Structure, Default Files, Folders
- Default References

Recap

(15 -20 min)
- The list of recap topics is given on the slides. The trainer may add more topics to the list.
- The trainer will ask the students about any ambiguities (if any) they have related to the previous lesson.
- If there will be any, the trainer will explain them as much as required.
- Then the trainer will share today's learning objectives with the students and begin the day.

Important Steps to Conduct the Session

ASP.NET Web Applications

- Slides have all the relevant information about the creation of development of the first application.
- Before starting the development, the trainer will ensure that all the prerequisites are available.

- To keep the students engaged in hands-on activities and practice, the activities will be conducted in the following manner:
  - Step 1: The trainer will first ask the students questions about the definition of the concepts shown on the slides. Then, after taking some random responses from the students, they will share a brief explanation of the concept given on the slide(s). The trainer will make sure and make a class rule that every time the trainer will ask a question a new student will respond instead of taking answers from some particular active and efficient students only.
  - Step 2: The trainer will demonstrate the code on their computer.
  - Step 3: The students will follow the trainer and practice writing the same code on their computers or the trainer could give them another code from the examples given on the slides to write and practice.
  - Step 4: The trainer will sum up a topic by reiterating important points from the topic before moving on to the next one.

Homework

Students will practice exercises on the topics covered today from these links:

ASP.NET Web Application Tutorial | How To Develop A Web Application In ASP.NET | Simplilearn
